

Paper Claims-to-EDI Conversion Services™

MedValue is the leading provider of medical claims processing services to Health Plans, TPAs, MSOs and Managed Care companies throughout the United States. We convert tens of thousands of HCFA-1500, UB-92 and Dental paper claims to EDI formats such as ANSI 837-4010 for our customers every day. Our customers enjoy the consistency and reliability that accrues to them by working with MedValue.

Simple and affordable, our service automates your front-end claims processing, cuts costs, eliminates the manual data entry and OCR verification, and improves accuracy of paper claims adjudication while at the same time improving turnaround time. It additionally enhances productivity of claims examiners by archiving paper claims and attachments to our web-based Document Management System, for easy Search and Retrieval of claims and convenient access anytime.

Are you facing these Challenges?

- Shortage of motivated claims data entry staff, who can be consistently relied upon
- Overburdened by paper claims because of lack of automation
- Antiquated or inadequate technology platforms
- Rising employee wages and benefit costs
- High volume of paper claims backlogs
- High cost and low reliability from existing vendor

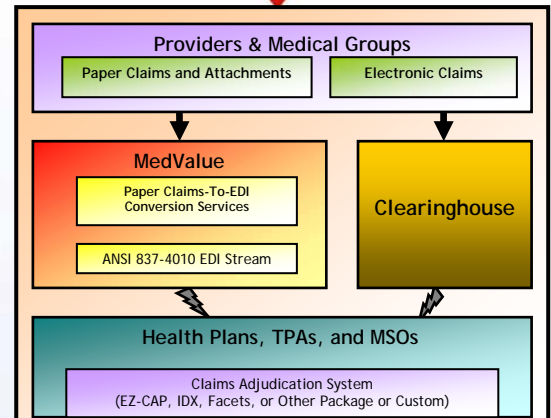

You can count on us for consistency & reliability

MedValue's Paper Claims-to-EDI Conversion Services have been designed to specifically address these challenges. The custom solutions enable Claims Departments to eliminate paper and populate their Claims System with claims data without requiring any manual data entry. MedValue's Paper Claims-to-EDI Conversion Services provide our clients' two key capabilities reliably and consistently on a daily basis:

1. Converts your paper HCFA/CMS-1500, UB-92 and Dental claims and stores them electronically in our web-based **Document Management System (DMS™)** for easy Search and Retrieval at any time from any PC connected to the Internet.
2. Converts your paper claims into a standard EDI stream (ANSI 837-4010 A1 or NSF formats), similar to the ones received by your claims department for electronic claims.

Our People & Processes are our Differentiation

Our process is easy to implement. On a daily basis, your staff scans the HCFA-1500, UB-92 & ADA claims along with attachments to our Secure FTP Servers. Within 1-2 days, we process and provide you with the EDI 837-4010 output for your staff to load into your Claims Adjudication System such as EZ-CAP, IDX, DIAMOND, FACETS, and other systems. We then store indexed images of your paper claims and attachments online on our web based DMS, and burn the archived data onto DVDs and ship them to you for easy storage at your location. We also provide you a Management Information Summary on our web based **Workflow Management System (WMS)** portal, and via daily email status reports so that every claim sent to us and processed by us is accounted for.

Low Cost & High Value

Our services are very affordable and are a variable cost to you. You do not need any upfront expenses on Hardware, Software or IT staff at your end.

MedValue clients are saving between **40%-60%** off their fully loaded paper claims processing cost and enjoying **99.5%** accuracy by using MedValue's Paper Claims-to-EDI Conversion Services.

We are Easy to Work with

Our scalable infrastructure and qualified resources can easily transition processing of your claims to MedValue within 30 days. Our Account Manager and project teams will shield you from the mundane and day-to-day headaches.

You will derive following Benefits

- Eliminate handling of Paper Claims
- Cut Paper Claims Processing Costs by 40-60%
- Archive, Search, and easily Retrieve Paper Claims and Attachments from our web based Document Management System
- Improve accuracy of Paper Claims Adjudication
- Improve HIPAA and CMS compliance for audit trails and paper claims tracking
- Reduce long-term paper storage costs
- Improve turnaround times & eliminate backlog

Call us today to see how TPAs, Health Plans, MSOs and Managed Care Entities have benefited by partnering with MedValue for their unique claims processing needs.
